Product Teardown

Mayank Kumar

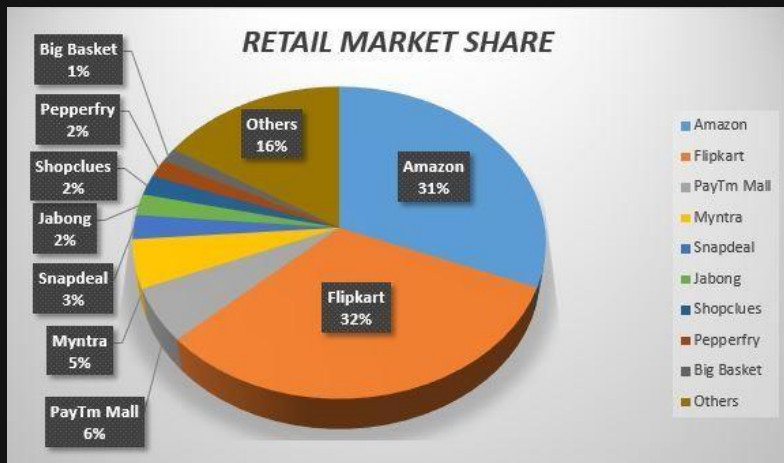

It's an American multinational technology company with popular products in e-commerce, cloud computing, digital streaming and AI fields. Founded by Jeff Bezos in Washington, back in 1994, today it is one of the big 5 American info-tech companies. Its revenue as of 2021 is around \$ 470 Billion.

Its Indian subsidiary, Amazon India has onboarded over 10 lakh sellers & has 22 million prime customers. Worldwide it has 1.468 million employees (2021) and continues to grow with over 2.7 billion visits in Jan 2022. In 5 product categories, amazon holds 90% market share.

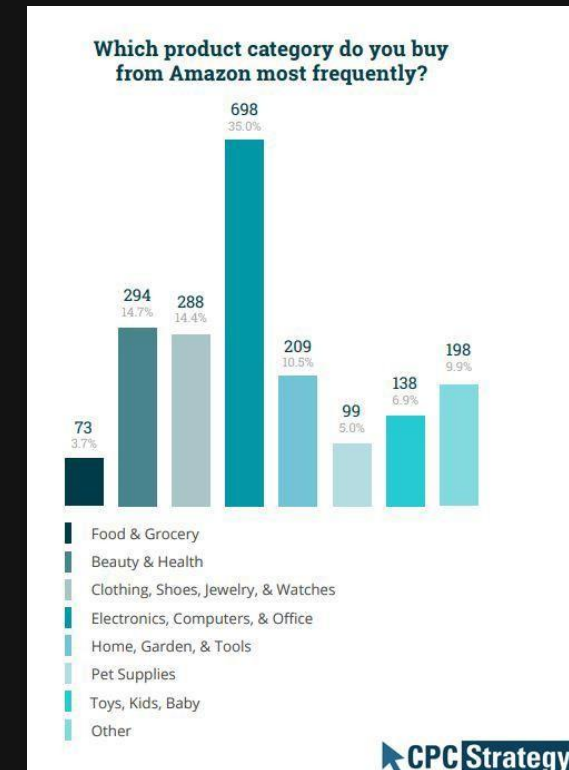

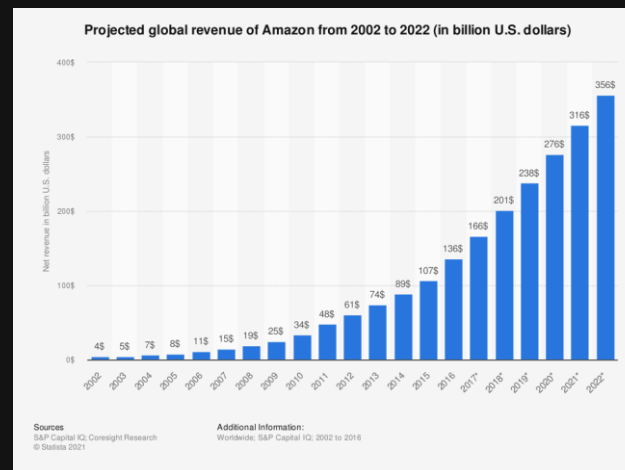

Its also a big market price research centre:

- 66% of Indian urban active users have researched online before buying products.
- 52% of the online researchers have visited Amazon for their research.

### Competitors split:

### Global Revenue:

### Value Proposition:

- Low Price
- Fast Delivery
- A wide selection of products

Rahul  
23, Working Professional  
Gurgaon, India

#### Description:

Being a netizen, he prefers to buy things online. It saves him time and he doesn't get any benefit in offline market (new to town & cant bargain). Finds time spent on shopping a hassle. Want to get reviews before purchasing anything.

#### Pain Points:

Wants to schedule deliveries per convenience.  
Wants doorstep delivery for all purchases.  
Offline shopping is time consuming and a hassle.  
Sometimes defective / mismatched products delivered.

Kiran  
38, Home Maker  
Lucknow, India

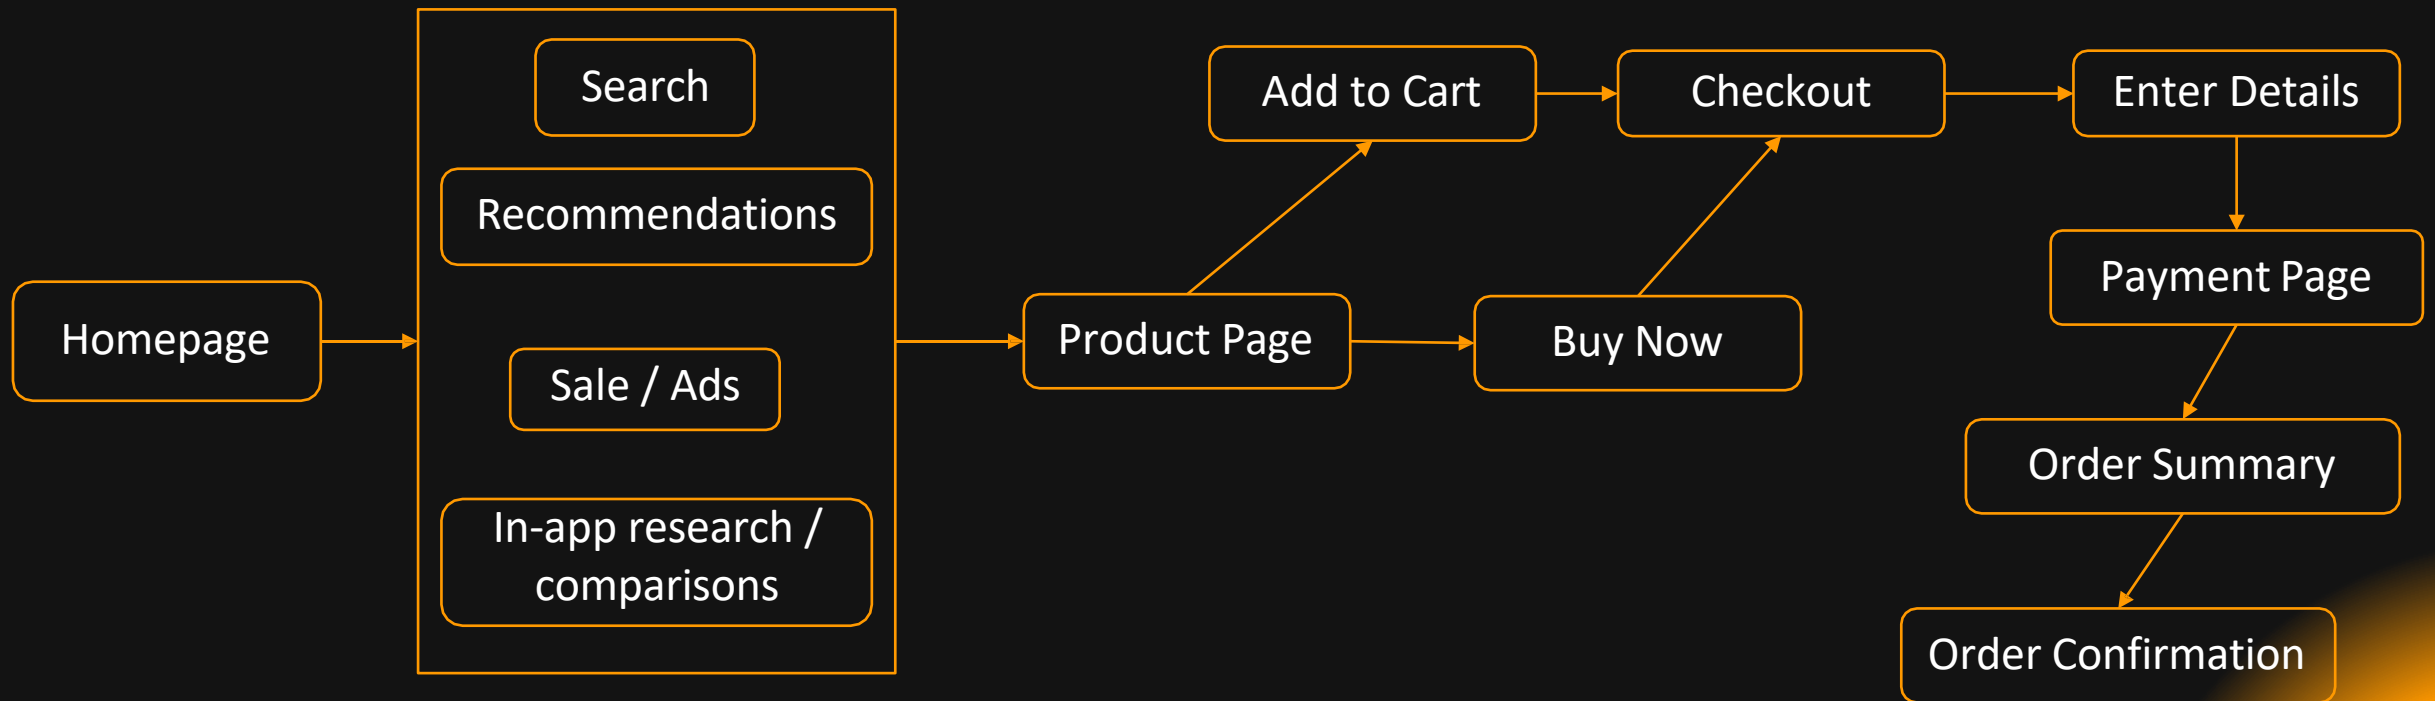

#### Description:

Not tech savvy. Has to buy household items. Also buys other things like dresses & essentials. While she does prefer offline shopping due to trust and physical examination of product, but it's far and travel costs make up for discounts she bargains.

#### Pain Points:

Slower delivery times  
Sometimes finds mismatched / damaged products.  
Return process lengthy, at times up to 14 days.  
Can't use complex UI.

Thinking

Wow those are some awesome deals. Do they have it on gym gloves?

I like the suggestions. Don't want wrist support for now. Lets check "gym gloves for men"

These are awesome choices and deals!

Thinking

I like this blue variant. Why doesn't this include a size chart description like clothes? I don't know what to measure now

I have many addresses saved. Have to delete a few of them later.

I think I will be at home on that day. Lets select other details quickly.

Feeling

Pain Points & Solutions

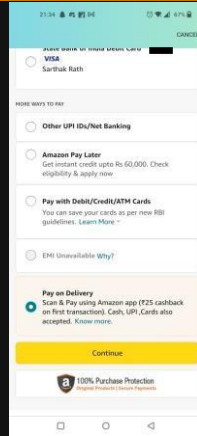

**Size Chart not always present. Inadequate Filters**  
Need to insert size chart and describe how to measure. Add desired filters to make search experience more precise

**Forgets to delete old addresses.**  
Simple periodical reminders

Done!

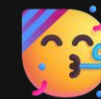

Thinking

I have some cashback balance from last order's offers. I like how simple the offers & credit work in this app.

Everything looks good. That was fast!

Yay! Its going to get delivered tomorrow? Wow! I hope the product turns out great. That was a great deal!

Pain Points &  
Solutions

## The Pros

- Voice search, 360 view and AR feature really take UX to another level.
- The address and other details selected are automatically recent ones, saves user effort.
- UI is intuitive and simple, easier to locate elements due to contrast.
- Image search feature is really easy to find and use.

## The Cons

- Should remind to delete unused addresses.
- Although UX is very good, the overall UI looks slightly basic.
- Listing page has fewer search filters.
- When Amazon pay is used, COD is unavailable. Considering Indian base prefers COD, this should change.

**North Star Metric:** # Net completed orders.

- Conversion Rate
- Bounce Rate of all UI steps to place order
- Average order time
- Order Cancellation rate
- #Orders returned / #Orders completed
- DAU / MAU
- # Fresh customers
- CTR on Search Button
- Average order completion time
