Product Teardown

Mayank Kumar

Flipkart is an Indian e-commerce company, founded back in 2007 by Sachin & Binny Bansal. Incorporated in Singapore and headquartered in Bangalore, the company started with online book sales, later entering other product categories such as consumer electronics, fashion, home essentials, groceries, and lifestyle products. Currently it has over 80 million products across 80+ categories.

The total revenue in 2022 was that of Rs 43,357 crore was reported for the past fiscal year of 2020-2021; 25% more than its revenue in the fiscal year of 2020

As of March 2017, Flipkart held a 39.5% market share of India's e-commerce industry which increased to 60% (For flipkart group in 2021 festive sales).

Competitors:

Value Propositions:

- Accessibility
- Convenience
- Price
- Risk reduction
- Brand/Status

Mission Statement:

“Ab har wish hogi poori!”

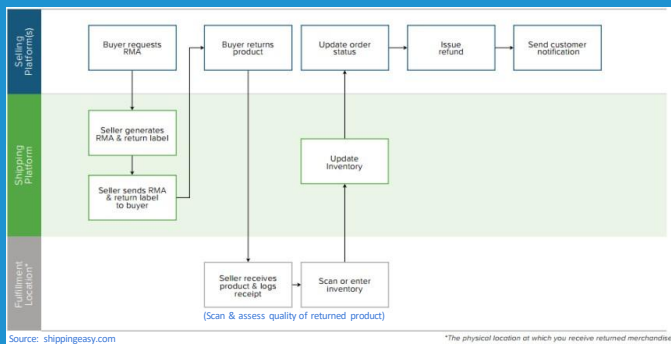

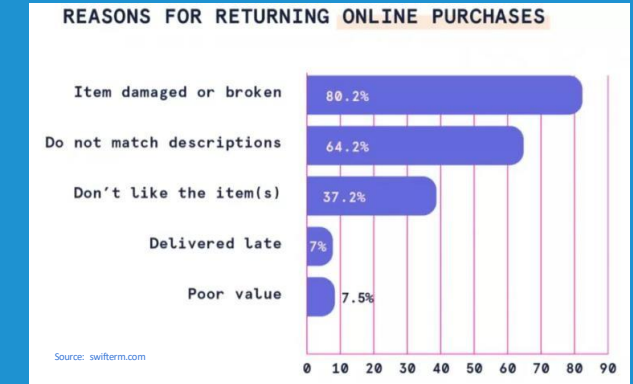

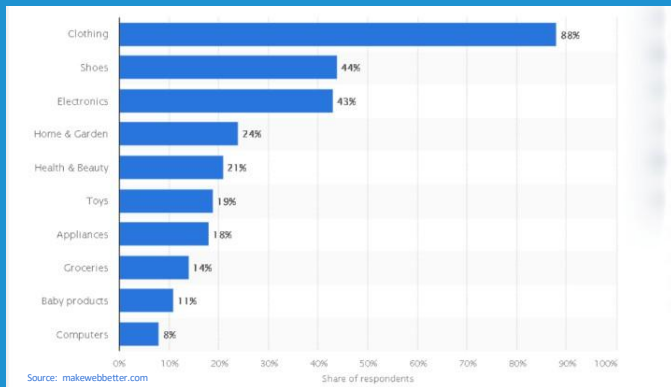

Vision:

To be largest E-commerce marketplace in India

Return Overview:

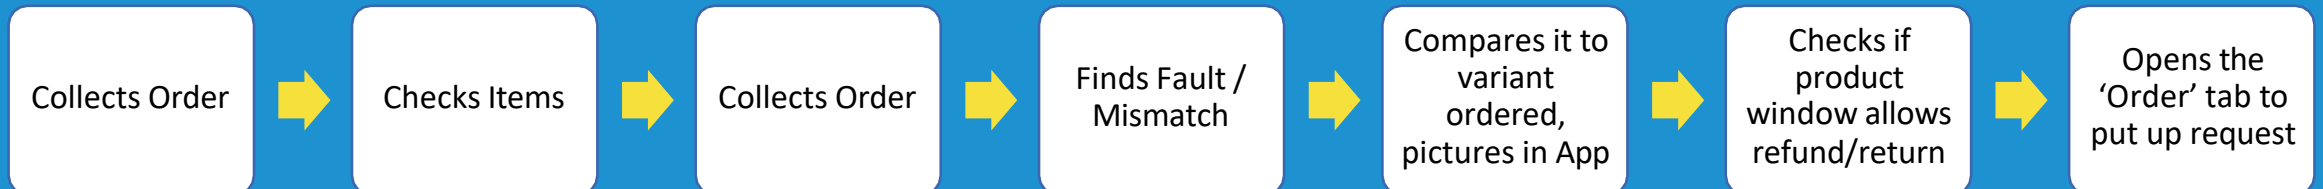

According to these data points, the most returned product type is clothing with a leading 88%.

The most popular reason to return is that item is damaged or broken. However, it also includes instances where customer used the product within the return period and later claimed it to be broken/damaged.

This is the flow product goes through in case of an average return process. The cost of return or refund is beared by sellers in terms of packaging, forward, and reverse logistics

User Action Flow before opening app for return:

Rahul
32, Business Owner
Delhi, India

Description:

Has partnered up with Flipkart to increase his customer reach outside local in order to increase revenue. Earlier used to have a no return policy, but to increase customer base, added the policy back.

Pain Points:

Customers order multiple products, try them out and return them after that.

Customers order multiple product variants, try them, then return the ones not required.

Return process is expensive and lengthy, up to 14 days in some cases.

Kirti
36, Home Maker
Indore, India

Description:

Engages in shopping in spare time. In recent times, started to shop online as well. While she does prefer offline shopping as she can test the product, but it's far and travel costs make up for discounts.

Pain Points:

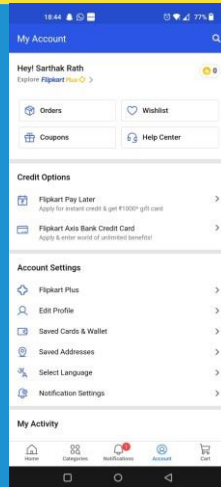

Finds damaged products sometimes.

Sometimes the variant ordered isn't matching with what arrived or quality difference between advertised and received products.

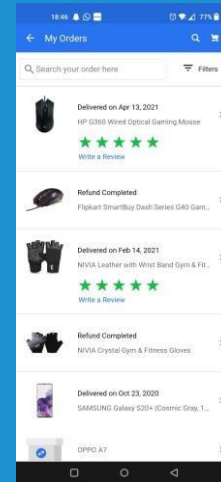

Return process lengthy, up to 14 days in few cases.

Opens Order page

Opens Order

Thinking

I ordered boat charger. Instead I got a second copy charger. I hope they give me a refund.

I hope the return date hasn't gone by and there are no other hidden T&C to this.

This was the order. Good! I still have time to return this. I finally found the return button.

Feeling

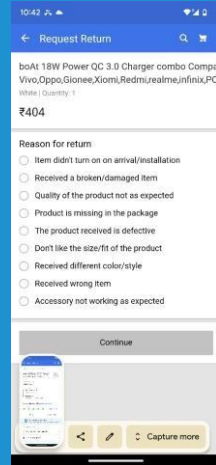

Pain Points & Solutions

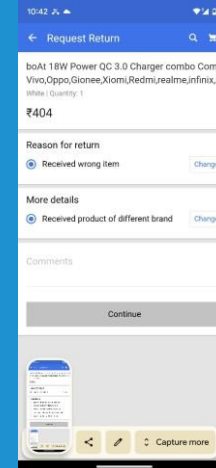

For a new user, he **wont** be able to **navigate** easily to return button.
Main search bar should also be able to search common settings

Fill Reasons

T&C

Thinking

There sure are a lot of questions. I hope this process doesn't take too much time.

I entered my reasons. I hope they qualify for a return.

Good that I still have the packing, but they are asking about the damage. I had to open the packing of course, does that count?

Feeling

Pain Points & Solutions

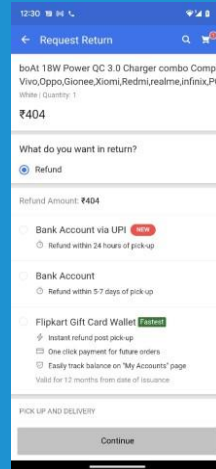

In case of **reason not found**, there should be an option to mention that.

Ambiguity

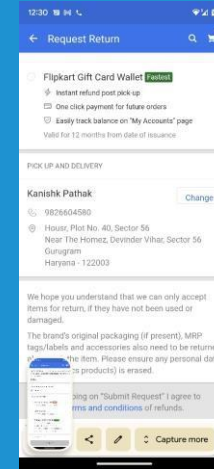

Should state more clearly 'Apart from the expected damage due to opening' or 'enough to carry the package safely back'

Done!

Thinking

I want a refund of the amount. It's exactly what I wanted. Yay!

Sounds good. Looks like the process is finally finishing up?

Yay! Finally done! Glad I was able to get it done.

Feeling

Pain Points & Solutions

Inconvenience – have to enter bank details or compromise on account choice.
Inclusion of option “Refund to account used for purchase”

The Pros

- Easy to navigate after finding the return button.
- T&C and the steps of return clearly stated avoiding confusion.
- Gift cards reduce overall churn rate.
- A comprehensive list of reasons of return, which varies depending on product and amount.
- Overall UI is aesthetic and easy to understand.

The Cons

- There is no way to indicate if reason not found in given options.
- Customer might be irritated while filing return, should not be prompted to type as it takes more effort.
- The return button not intuitive for new users.
- No option to transfer to original account used for purchase.
- Ambiguity in product description & while specifying how much damage is acceptable to package.

North Star Metric: # Net completed orders per day.

For returns feature:

- Customer Return Rate: $\frac{\text{\# Units returned}}{\text{Total \# units delivered successfully}}$.
- Customer Exchange Rate: $\frac{\text{\# Units exchanged}}{\text{Total \# units delivered successfully}}$.
- Return Cancellation Rate: % Return cancellations.
- % Successful Returns.
- $\frac{\text{\#Orders returned after one day}}{\text{\#Total orders returned}}$.
- $\frac{\text{\#Orders returned after one week}}{\text{\#Total orders returned}}$.
- Total time taken to fulfil Returns
- Reason split of returns category wise
- NPS of Returns.
